MALLADI SATYA BALAJI

Data Analyst — Python — SQL — Data Visualization

Andhra Pradesh, India
satyabalajim@gmail.com | +91 7416905212
LinkedIn: satyabalaji-malladi | GitHub: Satya-balaji-malladi

Professional Summary

Computer Science Engineering student specializing in Artificial Intelligence and Machine Learning with hands-on knowledge of Python, SQL, data analysis, exploratory data analysis (EDA), and data visualization. Skilled in using Pandas, NumPy, Matplotlib, and scikit-learn for data processing and analysis. Experienced in developing a college event attendance management system involving structured student data, attendance tracking, reporting, and analytics. Seeking an entry-level Data Analyst role to apply analytical thinking, programming, and problem-solving skills to real-world datasets and data-driven decision making.

Technical Skills

Data Analysis:	Data Cleaning, Data Wrangling, Exploratory Data Analysis (EDA), Data Visualization, Basic Statistical Analysis
Programming:	Python, SQL, Java, C
Python Libraries:	Pandas, NumPy, Matplotlib, scikit-learn
Databases:	SQL, SQLite, MongoDB, Supabase, Google Sheets
Machine Learning:	Data Preprocessing, Feature Preparation, Logistic Regression, TF-IDF, Classification, Model Evaluation
Backend / Web:	Flask, FastAPI, REST APIs, Google Apps Script, HTML, CSS
Developer Tools:	Git, GitHub, Jupyter Notebook, Google Colab, VS Code

Projects

BVC Event Attendance Management System *Google Apps Script, Google Sheets, JavaScript*

- Developing a role-based event attendance management platform for managing student participation, attendance records, events, users, and reports.
- Designed structured data workflows for storing, retrieving, filtering, and managing student, event, participant, and attendance information.
- Implemented student ID/barcode-based attendance tracking with automated record updates to reduce manual attendance processing.
- Developed dashboard and reporting functionality for analyzing student participation, attendance counts, active events, and system statistics.
- Worked with data validation, filtering, searching, session management, database operations, and role-based access control for multiple user roles.

Exploratory Data Analysis Projects *Python, Pandas, NumPy, Matplotlib*

- Performed data cleaning, preprocessing, filtering, transformation, aggregation, and exploratory analysis on structured datasets using Python.
- Used Pandas and NumPy to manipulate datasets, handle missing values, calculate summary statistics, and identify patterns in data.
- Created data visualizations using Matplotlib to analyze distributions, trends, relationships, and key insights from datasets.

Education

Bachelor of Technology (B.Tech) **Expected 2027**

Computer Science and Engineering – Artificial Intelligence & Machine Learning

Bonam Venkata Chalamayya Engineering College (BVC Engineering College)
Andhra Pradesh, India

CGPA: 7.71/10

Relevant Coursework

Python Programming, Database Management Systems, Data Structures and Algorithms, Statistics, Machine Learning, Artificial Intelligence, Data Analysis, Computer Science Fundamentals

Additional Information

Languages: Telugu, English

Areas of Interest: Data Analytics, Data Visualization, Business Intelligence, Data Science, Machine Learning
